Measurement

Year 3

Time

Telling the time is an important skill that we need to learn. It helps us to become organised and to know how long something takes to do or happen (duration). A unit of time is any particular interval: second, minute, hour, day, month and year. Months and years are used to measure longer periods of time.

Builds from Year 2:

Compare intervals of time.
Tell and write the time to five minutes.
Quarter past/to the hour.
60 minutes in an hour.
24 hours in a day.

This year:

Tell the time (analogue including Roman numerals).
Interpret a 24-hour clock.
Calculate and compare durations of time.
Understand the difference between am and pm.

Leads to Year 4:

Convert time between analogue and digital 12- and 24-hour clocks.
Solve problems involving converting from hours to minutes, minutes to seconds, years to months, weeks to days.

Analogue and Digital Clocks

24-Hour Time

	13:00	1 p.m.	1 o'clock	
	14:00	2 p.m.	2 o'clock	
	15:00	3 p.m.	3 o'clock	
	16:00	4 p.m.	4 o'clock	
	17:00	5 p.m.	5 o'clock	
	18:00	6 p.m.	6 o'clock	
	19:00	7 p.m.	7 o'clock	
	20:00	8 p.m.	8 o'clock	
	21:00	9 p.m.	9 o'clock	
	22:00	10 p.m.	10 o'clock	
	23:00	11 p.m.	11 o'clock	
	00:00	12 a.m.	12 o'clock	

Time can be written in a variety of ways.

Roman Numerals

I

one

V

five

X

ten

Compare Durations of Time

60 seconds = 1 minute

60 minutes = 1 hour

24 hours = 1 day

180 seconds	is the same as	3 minutes.
90 minutes	is shorter than	2 hours.
48 hours	is longer than	1 day.

Calculate Durations of Time

20 minutes has passed.
