

Home Learning

Your home learning tasks for half term are listed below. We would like you to complete the daily activities; the other activities are optional. If you would like to share what you have done, you can use this home learning book to record, upload your work to Tapestry or bring it in to show the class. That being said, our overall message to families is for them to prioritise what is most important for very young children: reading together, spending quality time with one another, and a good night's sleep!

Daily:

'Book Snuggling'

Read with an adult at home for at least 10 minutes every day. Picture books, familiar or unfamiliar stories or your book from the Lending Library (chosen by your child each day).

Sticky Learning:

- Encourage your child to write their name (correctly formed) on any work they do.
- Create a picture demonstrating how you have changed as you have grown from baby to toddler to child. What might you look like as an adult?
- Practise speedy recollection of ways of making 5.
- Use objects, fingers or pictures to practise bonds of 10.

Outdoor Learning:

- Spring walk: What signs of spring do you see?
- What sorts of plants do you see most often? Which are common plants and trees where you live?
- What shapes do you notice when you are outside? Are they 2D or 3D shapes? Can you describe their properties? (this means they can tell you about their sides, edges and corners)

Wellbeing:

Think about when you last:

- Told someone why you like them
- Remembered a favourite memory with someone
- Shared or made plans for something to do together in the future

Be mindful; take time to notice your body's motion and movements. Think about:

- What your heart rate feels like (fast/slow)
- What your breath feels like (fast/slow/deep/shallow)

Name 3 actions you can take if you are worried or afraid.

If you are not sure, think about:

- What adults you know to help you
- Who is there to help keep us safe
